

Who can steal anything with both hands cover ring their eyes?

Perfect combination with security fog

The Security Strobe is perfect in combination with security fog. A flashing lamp helps to put maximum pressure on the burglar.

Suits all interior

An elegant and discreet design that suits most homes and businesses.

Security Strobe™

A high-speed flashing lamp is a discreet, but very stressing and efficient security device to burglars. Particularly in combination with a fog cannon, a flashing lamp creates chaos and is the ultimate burglary protection that drives away even the broad-shouldered criminals.

Features:

- Security Strobe makes 4-6 flashes per second and in combination with security fog it's impossible for burglars to orientate and navigate the premises
- We recommend Security Strobe because no one can steal with both hands covering their eyes
- Suitable for all alarm systems
- Security Strobe is vandalism-proof with impact-resistant front
- For wall and ceiling mounting

Specifications:

Security Strobe makes 4-6 flashes per second (recommended). Adjustable frequency and time
Power consumption: 1100 Watt
Power connection: 230V, 50 Hz
Input: Galvanically isolated optocoupler. 9-15 VDC, 12 VDC/7 mA
Energy-conserving with a standby consumption of less than 5 Watt
Mounting bracket included
Dimensions (mm): L: 405 x W: 160 x D: 42
Weight: 5 kg
CE marked

Printing errors excepted. Subject to changes to technical data.
