

Security you can trust

Texecom

National Protective
Security Authority

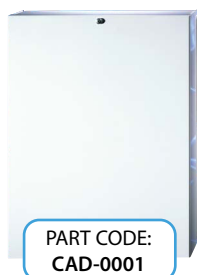

NPSA Accredited Control Panels & Peripherals

The National Protective Security Authority (NPSA) is the government authority for protective security advice to the UK national infrastructure. Their role is to protect national security by helping to reduce the vulnerability of the national infrastructure to terrorism and other threats.

NPSA accreditation allows certain Premier Elite panels to be used to protect critical UK facilities such as government buildings and utilities, enabling qualified installers to use Texecom in these environments.

The Catalogue of Security Equipment (CSE) is available to help security practitioners identify appropriate security equipment. For guidance on classification please visit the NPSA website www.npsa.gov.uk.

Our commercial grade, expandable control panels feature integration compatibility with a number of leading manufacturers in such disciplines as CCTV & Access Control. Each Premier Elite control panel shares the same programming and user platform, ensuring instant product familiarity across the range.

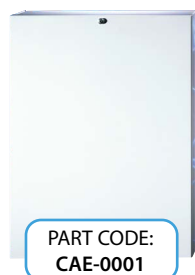

Premier Elite 168

Control panel expandable to 168 zones

- 16 Areas / Groups
- 200 User Codes
- 2000 Event Log Time & Date Stamped
- Compatible with NPSA accredited Premier Elite peripherals
